

To : All SIA Student Members

**RE: SENIOR ARCHITECT – STUDENT MENTORSHIP PROGRAMME**

The Singapore Institute of Architects is pleased to invite student members to participate in this Mentorship Programme. Under the programme,

1. SIA student-members will be assigned to respective Senior Architect Mentors for technical guidance in their architectural education for a period of one year, with option to extend till end of course of study.
2. Student-members shall be privileged to seek technical-counsel on their course work with their Mentor at a mutually-convenient schedule.
3. Mentors will provide the opportunity for student-members to gain valuable insight into the practical aspect of architectural design and practice. This may be via site visits or even attendance at office project briefings, if appropriate.
4. Mentors will acquaint student-members with the design and building process, construction methods as well as problems and solutions of architectural practice and design, with an overview for them to understand the entire design and implementation process.

SIA believe that it is the moral duty of the present generation of architects to nurture the next in order that the practices evolve in an environment of excellence. This will also enable student-members to establish a professional relationship with firms at an early stage, and bridge employment expectation gaps between student and firm, if and when students decide to work with the same firm upon graduation.

The Institute believes that this programme can contribute significantly to uplifting the overall state of architectural practice in Singapore.

We look forward to your participation in this programme.

Please complete the attached form and return to SIA.

Thank you.

Yours sincerely,

Theodore EC Chan  
Chairman, Board of Architectural Education  
Singapore Institute of Architects
